

# new for 2009 EasyClear

The award winning fully integrated filtration system now has an extended range and improved specification.

The new EasyClear range comprises three units for ponds up to 3000, 6000 and 9000 litres. The fully integrated units combine a pump, filter and UVC and can be completely hidden in the pond. They provide the consumer with a product that is easy to install, provides clear and healthy water, and an attractive fountain and/or waterfall.

EasyClear enables an attractive waterfall and/or fountain to be easily set up within the pond. The EasyClear 3000 has been improved by offering the consumer an option of a fountain or waterfall. The EasyClear 6000 and 9000 are both able to run a fountain and waterfall simultaneously. All products allow the consumer to adjust the size of the fountain and waterfall independently, ensuring the perfect effect is achieved for their pond.

Improvements have been made to the new EasyClear range to ensure that the range is industry leading, in terms of both quality and reliability. Hozelock are so confident in these products that they are providing a 3-year guarantee.

The EasyClear uses integrated foam filters to catch waste particles, ensuring crystal clear pond water. Hozelock have also added Kaldnes™ biomedica to improve the biological capability and to ensure that the water is healthy for fish and other wildlife. The filters are easily accessible for cleaning through a tool free hatch at the top of each unit. The Kaldnes™ biomedica is also sealed in gauze bags that make it easy to clean and put back in the unit.

Each unit has a highly effective integrated UVC that eliminates green water, ensuring crystal clear water. The UVC is also easily accessible due to a bayonet fitting, which allows the user to easily replace the lamp or clean the quartz tube.

These EasyClears are the easiest way to achieve a clear and healthy pond. Installation is made quick and easy with feet for stability, a fountain ball joint for easy levelling of the fountain and a single cable that powers the pump and UVC.

All of these fantastic features mean Hozelock are confident

# EasyClear™

The award winning fully integrated filtration system. Now with an extended range and improved specification

The new EasyClear range comprises three units for ponds up to 3000, 6000 and 9000 ltrs. These fully integrated units combine a pump, filter and UVC and can be completely hidden in the pond. They provide the consumer with a product that will provide clear and healthy water, easy installation, and an attractive fountain and/or waterfall.

## EasyClear Benefits:

### 1 Clear water

- The UVC eliminates green water.
- Filter foam sieves out solid particles in the water.

### 2 Healthy Water

- Kaldnes™ bio-media ensures that the water is healthy for fish and plants.
- The Kaldnes™ bio-media is now stored under the foams in gauze bags for quick and easy cleaning.

### 3 Fountain & Waterfall

- Reliable and attractive fountain and waterfall display. (EasyClear 6000 & 9000 can run a fountain and waterfall simultaneously. EasyClear 3000 can run a fountain or waterfall)
- 3 fountainhead options for consumer display choice (2 tier, 3 tier and bell)

### 4 Easy Installation

- One power cable for simple and cost effective installation.
- Ball joint for easily levelling of the fountainhead.
- Feet for stability.
- Fountain stem extension for varying pond depths.
- Independent flow control to adjust the size of the fountain.
- Independent flow control to adjust the size of the waterfall.

### 5 Easy Maintenance

- Latch for tool free access for cleaning foams and Kaldnes™ bio-media.
- Anti-clog fountain strainer for low maintenance.
- Bayonet fitting for easy access to the UVC cleaning and changing.
- Water bypass allows continued UVC and fountain operation if foam is blocked.
