

SpeedyTie

THE RE-USABLE, QUICK-RELEASE TIE

is the world's first fully re-usable easily releasable tie.

With its patented easy to release trigger, applying and re-applying SpeedyTie™ is simple. And because it's re-usable it can be used again...and again...and again.

Developed specifically for use in electrical, HVAC and construction industries, its releasability, re-usability, and ease of application means SpeedyTie™ is particularly suited where temporary bundling or fixings are required.

Features and Benefits

- Fully re-usable. SpeedyTie™ is the first product of its kind designed to be re-used again and again eliminating hassle and saving you money.
- Easy releasable. SpeedyTie™'s patented hand release trigger makes removal of the product simple - even with a gloved hand. Flush or surface trigger available.
- Easy to apply. The patented quick release mechanism provides for quick and easy application of the product prior to final tensioning.
- Tuck away feature. Once applied, excess tails can be neatly tucked away providing for a safer application.
- Highly visible. Bright yellow in colour, the product gives high visibility even in harsh environments.

Applications

- Suspended piping. SpeedyTie™ is ideal as a temporary support aid during the installation of gas, water and air supplies.
- Site storage. Copper or plastic tubing, timber etc can be bundled and secured improving the housekeeping of your site. Items can be added or removed easily and the product simply re-applied in seconds.
- Temporary bundling of cables. SpeedyTie™ provides for the temporary bundling of cables during construction projects. Additional cables can simply be added to existing cable runs and re-secured.
